## RE: 2023 Catch Sharing Plan and Annual Regulations – Final Action

I very much enjoy our time spent Halibut fishing with friends and family. The time spend on the halibut grounds is less time spend fishing for salmon or rockfish. The Northern California area, weather permitting) fills is quota weeks before the season closes. With Oregon and Washington having much larger quotas then us, and not filling them, it would be beneficial if some of the Oregon/Washington quota was transferred to Northern California.
