RE: 2023 Catch Sharing Plan and Annual Regulations – Final Action

Honorable Council Members, I am writing this in regards to Pacific Halibut fishing opportunity's in California. I feel like the current California quota does not provide enough pounds, so that we have consistent opportunity's to last through out our summer season. I believe the past few years surveys were done by your organization that confirmed there is a healthy Pacific Halibut population in N. California and that we could benefit from some increased quota. I love eating and catching Pacific Halibut. Thank you for your consideration.
