RE: Workload and New Management Measure Update

As group of Unrepresented hook and line commercial fishermen that work in oregon, we are asking to be permitted as the framework of the Emily Scott efp but with an oregon address. Having already spoken to both, permissions given for copying all work as the system and methods have been successful. As scuttlebutt has it that the draggers and net boats are going to be let in the rca with the already charter boat and recreational fisheries, it would only be right to get the hook and line commercial fisheries involved in determining what is really out there.
